

FOR IMMEDIATE RELEASE

National Nail Corp. Introduces the **STINGER™ CS58** Cap Stapler

Grand Rapids, Michigan, April 25, 2008

National Nail Corp., a national manufacturer and distributor of building products for residential and light commercial construction, is pleased to announce the launch of their latest innovation in cap systems technology - the **STINGER CS58** pneumatic cap stapler.

The **STINGER CS58** is built on National Nail's market-leading Crossfire® Cap Stapler technology, delivering a staple with the holding power of a cap, and setting the pneumatic standard for best practice installation of roofing underlayments and housewrap. The **STINGER CS58** is compact and lightweight, weighing less than 4 lbs.! It is a performance balanced tool, ergonomically designed for maneuverability to reach tight spaces.

The **STINGER CS58** shoots a 5/8" 20 gauge staple only, "the length most often used by contractors for installing roofing felt and housewrap," said Brian Nieber, Regional Vice President and Cap Systems Brand Manager. "Sometimes referred to as 'fine wire', this category is already being touted as the new wave of pneumatic cap staplers and is the fastest growing segment of the pneumatic cap market. The **STINGER CS58** Cap Stapler is not only poised to own that growing market segment, it is technically superior and has a very affordable price tag for the contractor," said Nieber.

The **STINGER CS58** will be available in the new **STINGERPAC**, a bundled package that pairs the pneumatic speed of the **CS58** with the quick tack-down practicality of the **STINGER CH38** Cap Hammer – the best of both worlds at one incredible price.

Caps and staples for the **STINGER CS58** Cap Stapler are sold in **STINGER 5/8" Pneumatic StaplePacs** that contain 10 rolls of 200 collated caps and 20 strips of 100 staples.

National Nail Corp. is the leader in cap systems technology. The **STINGER CS58** joins the **STINGER CH38** Cap Hammer, the Crossfire® Cap Stapler from Spotnails and the Hitachi® NV50AP3 Cap Nailer, used for residential roofing and sidewall applications, and the **STINGER RT2** Cap Nailer from National Nail used for covering wood decks in commercial settings.

National Nail Corp. is an employee-owned company headquartered in Grand Rapids, MI. For more information, visit www.nationalnail.com.
