

A NEW SYSTEM. THE NEW STANDARD.

EDITORS' CHOICE AWARDS  
**TOOLS**  
2007 OF THE TRADE

**No Hose. No Air. No Problem.** The **Stinger CH38 Cap Hammer** is the first airless cap system that delivers the holding power of a cap with the speed and ease of a hammer tacker. The Stinger CH38 sets the new standard for securing roofing felt and housewrap, and is the latest innovation from National Nail Corp., the leader in cap systems technology.

CH38 Cap Hammer  
**STINGER**  
JUST CAP IT!

# NO HOSE. NO AIR. NO PROBLEM.

The **Stinger CH38** is the first hammer tacker to deliver a cap and staple. And it's easy to use—just pull the trigger and drive it in!

The **Stinger CH38** delivers value. Priced like a hammer tacker, the Stinger CH38 gets the job done for a fraction of the cost of a pneumatic cap stapler—and without the additional hassle and expense of a hose, compressor, and power requirements.

The **Stinger CH38** promotes best practice. Cap fasteners are a recommended installation best practice by housewrap manufacturers because caps help seal out moisture that can penetrate sidewalls. And because caps provide better holding power, fewer fasteners are needed to get the job done.

## EASE. VALUE. BEST PRACTICE.

*The Stinger CH38 Cap Hammer delivers it all.*
