

FOR IMMEDIATE RELEASE

National Nail Corp. Introduces the **STINGER™ CH38A** Autofeed Cap Hammer

Grand Rapids, Michigan, September 1, 2008

National Nail Corp., a national manufacturer and distributor of building products for residential and light commercial construction, is pleased to announce the launch of their latest innovation in cap systems technology - the **STINGER CH38A Autofeed Cap Hammer**.

No Hose. No Air. No Trigger. No Problem. The real story behind the latest addition to the **STINGER** Cap Systems stable. Designed for best practice installation of roofing felt and housewrap, the **STINGER CH38A** joins the **STINGER CH38** Cap Hammer to deliver the holding power of a cap with the speed and ease of a hammer tacker, but this little beauty does it without a trigger!

“It’s ingenious gravity feed mechanism allows the cap to be picked and positioned in place for the staple – just swing the tool and hammer it onto the substrate, roofing underlayment or housewrap,” said Brian Nieber, Regional Vice President and **STINGER** Brand Manager.

In addition, the **STINGER CH38A** delivers value. Priced like a hammer tacker, it gets the job done for a fraction of the cost of a pneumatic cap stapler. “That makes the **STINGER CH38A** the perfect cap delivery system for those contractors who want to promote best practice installation but don’t want the hassle or expense of a hose, compressor, and power requirements associated with a pneumatic tool,” says Nieber.

The **CH38A** uses the same **STINGER 3/8” StaplePac** as the **CH38**. “It will be easy for our customer and channel partners, distributors, dealers and home centers to offer an additional price point with the added convenience of the same fasteners for their contractors,” Nieber noted.

Caps and staples for the **STINGER CH38A** Cap Stapler are sold in **STINGER 3/8” StaplePacs** that contain 12 rolls of 168 collated caps and 24 strips of 84 staples.

National Nail Corp. is the leader in cap systems technology. The **STINGER CH38A** joins the **STINGER CH38** Cap Hammer, the **STINGER CS58** Cap Stapler, the Crossfire® Cap Stapler from Spotnails and the Hitachi® NV50AP3 Cap Nailer, used for residential roofing and sidewall applications, and the **STINGER RT2** Cap Nailer from National Nail used for covering wood decks in commercial settings.

National Nail Corp. is an employee-owned company headquartered in Grand Rapids, MI. For more information, visit www.nationalnail.com.
